

reVIEW

reVIEW (powered by Panopto) is the University's multi-media enhancement solution, designed to easily record and produce educational materials, which can be made available online for students to review in their own time and place of their choosing.

The Multi Media Enhancement Policy can be found [here](#).

How do I get started?

- See our [Quick Start Guide](#)
- See our [Staff Development Calendar](#)
- See which rooms are [reVIEW friendly](#)

To help you get started with reVIEW, we have written a comprehensive range of FAQ, and Panopto provide an exhaustive range of fully detailed help guides with screenshots on their website.

Supporting Educational Literature

Edwards & Clinton (2018) – Attendance and Attainment study – over reliance for lecture capture on lecture attendance. Not a replacement for none attendance.

Movement towards greater utilisation of TEL in day-to-day teaching (Johnson et al, 2015)

Flexibility of viewing materials at varying times & locations

Welcomed by student bodies - Motion 217 @ 2016 UK National Union of Students Conference.

What is reVIEW?

- Allows for easy recording and sharing of courses, lectures, and presentations. Designed to simplify the lecture-capture process. A Multi Media Enhancement (MME) Tool.
- Enables students to have the ability to access recorded teaching materials and lectures for revision and review is valuable.
- The reVIEW system is controlled by the presenter who is able to initiate recording, pause, edit and stop.

Pedagogy - Why use MME in our teaching?

- reVIEW is part of the University's commitment to engage students with their learning.
- Students value access to recorded teaching materials and lectures for revision and review.
- Students' describe how such recordings supplement learning rather than replacing attendance.
- A Learning & Teaching enhancement enabling: "Flipped" Classroom approach, Blended Learning, Distance Learning, TEL

Find out what the University of Sheffield reviewed as benefits

- Many students report that they find it much easier to learn material on a course with lecture capture (Traphagan et al., 2009)
- Students are eager to be able to use lecture capture to be able to review course content at a later date to enable them to clarify difficult concepts (Davis et al., 2009)
- Students who use supplemental learning have higher final marks (Von Kinsky et al., 2009)
- Students are able to spend less time taking notes and are able to engage with the course material rather than focusing on taking notes (Karnad, 2013)
- The majority of students access

lecture recordings in order to clarify areas that they did not understand from the lecture (Song et al., 2006).

News from the Project Team

- The final Multi Media Enhancement Policy has now been accepted and can be found [here](#).
- Please visit [here](#) to see which rooms across Sunderland and London Campus are now reVIEW Friendly.
- See the new **Digital First Video** for reVIEW here <https://www.sunderland.ac.uk/digital-first/>
- **Sir David Bell welcomes reVIEW**- see the executive blog here [usonline.co.uk/news/vice-chancellors-blog-29](https://www.sunderland.ac.uk/news/vice-chancellors-blog-29)
- TCLT and Edinburgh Building Room 210 are now reVIEW Friendly

▼ [reVIEW is coming soon and will support staff in using multimedia to enhance teaching across the University.](#)

As part of the University's strategy to enhance Learning and Teaching, a multimedia enhancement project is now well underway to provide teaching staff a tool to record taught sessions, which will enable students to reVIEW the session in their own time.

reVIEW (powered by Panopto) will be embedded and fully accessible via CANVAS, allows for the simultaneous capture of audio, video and applications (e.g. Microsoft PowerPoint) and the recording can be shared in a variety of ways during or after the presentation.

reVIEW will also provide the university a video platform which makes it easy for lecturers and instructors to:

- Flip the classroom
- Record lectures
- Live broadcast events
- Create 'how to' videos
- Offer video feedback on assignments
- Allows for video assignment submissions

There is a body of educational theory and research which supports the use of such tools to aid student learning. Indeed student feedback across the higher education sector has evaluated positively when multimedia enhanced tools are used in learning and teaching. One of the principal drivers behind using the reVIEW tool, is that teaching and learning materials can be reVIEWed by students, allowing for pacing of learning and for students to consolidate their learning.

- Solution supplier for reVIEW has been awarded to Panopto EMS Ltd following Ojeu procurement process
- Project Business Case approved by Digital First. See our business case [here](#).

Multi Media Enhancement Project Implementation
