

Enrolment Policy

All students wishing to study at the University of Sunderland are required to enrol before commencing their course. This policy applies to all students whether in country or overseas, and must be completed for each academic year of study. The policy describes the enrolment process, how and when students will be contacted, as well as how their data is captured and used. It also explains the process for invoicing student fees and the requirements for self funded and sponsored students. The repercussions of late enrolment and failure to enrol are also outlined. The policy is available here
